

Technology Solutions for the Legal Industry

Collaborate with Clients, Colleagues, and Partners, with Strict Confidentiality.

Fusion Connect has helped private practices and nationwide law firms overcome communication and security challenges for more than two decades. Mobility features such as voicemail transcribed as email help attorneys stay up to speed on cases and clients without disrupting court sessions. On-demand audio conferencing with recording capabilities improve note taking. Our intuitive portal simplifies system administration so firm administrators can focus on billable work.

OFFICE PHONE SYSTEMS

Attorneys can easily stay connected when court is in session with mobility features such as voicemail transcribed as email. Conference capabilities, call recording, and an intuitive portal with call reporting simplifies system administration and billing.

SECURE NETWORKING

Simplify network management across your office locations. Use bandwidth more efficiently to reduce access costs without sacrificing application performance.

MICROSOFT PRODUCTIVITY TOOLS

Provide office staff with Office 365 productivity tools while safeguarding business data and assets across devices.

UNIFIED COMMUNICATIONS

Stay in touch with clients and partners, whether you're in the office or in the courtroom. Use audio and video calling and conferencing. Communicate quickly and discreetly with individual or group chat. Take or make calls using your business number on any device.

HIGH-SPEED INTERNET

Connect your office locations reliably with predictable, cost-effective access. Power secure guest WiFi and streaming video.

MANAGED WIFI

Deploy private WiFi for employees, public WiFi for guests, and leave the management to us.
